

Siena Cork LEED Information

LEED CERTIFICATION: TECHNICAL STATEMENT

This document verifies that Siena Cork Flooring Products enable project teams to earn credits for the LEED® Certification of Commercial New Construction (NC) and Existing Buildings (EB).

LEED System	Applicable Credit	LEED Point Value
NC	MR 6, Rapidly Renewable Materials	1
NC	MR 7, Certified Wood	1
NC	EQ 4.3, Low-Emitting Flooring Systems	1
EB	MR 3, Alternative Materials	1

- Siena cork products are manufactured from cork trees from Portugal and Sardina. Cork trees are considered a rapidly renewable resource, as the bark used naturally renews itself after it has been harvested.
- FSC Certified HDF makes up 6.8mm of the overall 10mm thick flooring. Therefore, 68% of the product cost can be counted toward LEED NC MR Credit 7, FSC Certified Wood Products.
- When used in combination with low-VOC adhesives, this flooring type qualifies as a low-emitting flooring system.
- Because of the rapidly renewable quality of this product, if you are working on a major renovation project for an existing building then using this product can help you comply with **Materials and Resources Credit 3: Sustainable Purchasing – Facilities Alterations and Additions (LEED EBOM)**.
